PROFESSIONAL SUMMARY

Results-driven Computer Science undergraduate specializing in full-stack web development and applied AI, with experience building production-style systems using React.js, Node.js, FastAPI, REST APIs, SQL/NoSQL databases, and RAG/LLM-integrated applications. Strong foundation in Data Structures, OOP, and software engineering principles. Actively seeking a Web Developer or Full-Stack internship.

INTERNSHIPS

Intern — CloudGenius (Remote) *May 2026 – July 2026*

- Designed and implemented a full-stack AI-powered code explainer tool using Node.js, Express, and MongoDB Atlas, converting user-submitted code snippets into plain-English explanations, line-by-line breakdowns, and complexity insights.
- Integrated the Gemini 2.5 Flash API server-side, engineering sequential chunk processing to handle large code files reliably without hitting API rate limits.
- Implemented secure authentication (bcrypt, JWT in httpOnly cookies) and an access control model supporting both guest mode and authenticated accounts, with ownership checks to prevent unauthorized data access.
- Applied Agile methodologies while collaborating with a cross-functional team using Git/GitHub feature branching, ensuring code quality through direct verification of AI-assisted code and resolving real bugs before merge.

TECHNICAL SKILLS

Languages: Java, Python, C, C++, TypeScript
Frontend: HTML5, CSS3, JavaScript (ES6+), ReactJS, Bootstrap, Tailwind CSS
Backend: Node.js, Express.js, FastAPI, REST APIs, Authentication & Authorization
Databases: MySQL, MongoDB, PostgreSQL, pgvector
AI / ML: OpenAI API, Gemini API, Retrieval-Augmented Generation (RAG), Basic ML & NLP
Tools: Git, GitHub, VS Code
Concepts: OOP, Data Structures, Role-Based Access Control, Agile Methodology

SOFT SKILLS

Team Collaboration, Communication, Problem-Solving, Adaptability, Time Management, Agile Mindset

PROJECTS

Secure Rental Platform — *ReactJS, Node.js, MongoDB, REST APIs*

- Built a full-stack rental platform with property listing, search, and rental request management, using a responsive ReactJS UI for cross-device compatibility.
- Implemented secure JWT-based authentication with role-based access control (RBAC) for owners and tenants, and designed RESTful APIs for core business logic and data exchange.

LedgerIQ — AI Finance Reconciliation Agent — *React, TypeScript, FastAPI, Python, OpenAI API*

- Built LedgerIQ, an AI-powered financial reconciliation agent for the Razorpay AI Buildathon (Track 04: AI Finance Controller), processing a 105-record dataset across payments, settlements, invoices, and bank transactions.
- Engineered a deterministic 4-way reconciliation engine in Python/Pandas achieving 85.7%+ exception detection accuracy across ₹21.5L+ in transaction volume, surfacing ₹300,100 in amount at risk.
- Integrated an AI layer using OpenAI GPT-4o-mini for structured exception analysis and multi-horizon (1/3/7/30-day) cash flow forecasting, with a zero-dependency deterministic fallback for high availability, plus a full-stack dashboard (React 18, TypeScript, Tailwind CSS, Recharts) with AI-chat exception investigation and a chronological audit trail.

GST Sahayak — Grounded RAG Q&A System — *FastAPI, PostgreSQL, pgvector, React, Vite*

- Designing and building GST Sahayak, a Grounded RAG + Multi-Model Verification system that answers Indian GST legislation questions with hallucination-resistant, evidence-backed responses.
- Built a hybrid retrieval pipeline (FastAPI, PostgreSQL, pgvector, sentence-transformers) over a GST legal knowledge base, with an evidence-sufficiency gate that blocks LLM calls entirely when supporting evidence is insufficient.
- Architected a multi-model verification layer cross-checking answers from Gemini and locally-hosted open-source LLMs to generate a confidence-scored response, and built the React/Vite frontend and REST API layer connecting user queries to the pipeline.

TRAINING & CERTIFICATION

Full-Stack Web Development — Udemy Certification

- Completed an industry-oriented program covering both frontend and backend web development, with hands-on work in HTML5, CSS3, JavaScript, Bootstrap, Node.js, MySQL, MongoDB, and Git/GitHub.

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science Engineering
Sharda University, Greater Noida | Currently Enrolled
